

STATE OF MICHIGAN

DEPARTMENT OF COMMUNITY HEALTH
LANSING

JENNIFER M. GRANHOLM
GOVERNOR

JANET OLSZEWSKI
DIRECTOR

November 13, 2007

Dear Chief Executive Officer / Executive Director:

The purpose of this letter is to clarify responsibility for mental health services for Medicaid individuals with mild to moderate mental illness and a co-occurring substance use disorder enrolled in a Medicaid Health Plan (MHP). Section II-G-1 of the MHP contract states that MHPs must provide a maximum of 20 outpatient mental health visits per calendar year. Furthermore, Section 1.6 of the Mental Health / Substance Abuse Chapter in the Medicaid Provider Manual delineates which beneficiaries are deemed "mild to moderately mentally ill" and therefore, eligible for mental health services through the MHP, as follows:

"The beneficiary is experiencing or demonstrating mild or moderate psychiatric symptoms or signs of sufficient intensity to cause subjective distress or mildly disordered behavior, with minor or temporary functional limitations or impairments (self-care/daily living skills, social/interpersonal relations, educational/vocational role performance, etc.) and minimal clinical (self/other harm risk) instability.

The beneficiary was formerly significantly or seriously mentally ill at some point in the past. Signs and symptoms of the former serious disorder have substantially moderated or remitted and prominent functional disabilities or impairments related to the condition have largely subsided (there has been no serious exacerbation of the condition within the last 12 months). The beneficiary currently needs ongoing routine medication management without further specialized services and supports."

For individuals eligible for mental health services under the MHP contract, MHPs may not deny mental health treatment due to the existence of a co-occurring substance use disorder. MHPs must provide the medically necessary mental health services whether the substance abuse diagnosis is the individual's primary diagnosis or a secondary diagnosis. While MHPs are not required to provide substance abuse treatment, the MHP should direct the plan's mental health providers to identify potential substance abuse issues. If a substance abuse issue is identified, the MHPs must provide the medically necessary mental health treatment and coordinate with the appropriate Pre-Paid Inpatient Health Plan (PIHP) regarding the member's substance abuse treatment. MHPs must provide medically necessary mental health services without consideration of the member's decision to seek, or not seek, substance abuse services or on the success or failure of substance abuse treatment.

The PIHP is responsible for coordinating Medicaid substance abuse services. Therefore, the appropriate point of referral for Medicaid substance abuse services is the PIHP. Michigan Department of Community Health (MDCH) expects MHPs and PIHPs to educate providers regarding screening and referral for substance abuse issues. MDCH has attached a chart that lists the MHP and PIHP available in each county to facilitate coordination among the PIHP and MHP, as well as a listing of available telephone numbers. The "Medicaid Health Plans and Pre-paid Inpatient Health Plans by County" chart is also available on the MDCH website at www.michigan.gov/mdch; click on Providers.

If you have questions regarding this policy clarification, please contact Cheryl Bupp at (517) 241-7933 (for MHPs) or Mark Keilhorn at (517) 241-5066 (for PIHPs). Thank you for your continued participation in the Michigan Medicaid program and your commitment to providing quality care to Michigan's most vulnerable citizens.

Sincerely,

A handwritten signature in black ink, reading "Paul Reinhart". The signature is fluid and cursive, with the first name "Paul" and last name "Reinhart" clearly distinguishable.

Paul Reinhart, Director
Medical Services Administration
